

## FEATURES

Accessories that adapt to the F450 PRO machine to perform a single maneuver, cutting into 4 equal portions.

## DIMENSIONS

Up to 34 cm in diameter.

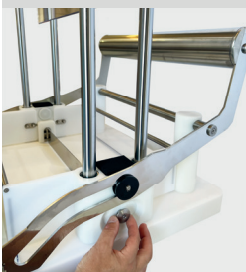

## MATERIALS

Composed of POM segments and a double-beveled stainless steel (INOX) blade, materials suitable for the food sector.

## 1/4 CUTTING BLADE

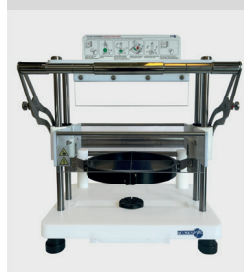

With the machine lowered, we activate the locking mechanism to proceed with the disassembly of the cutting blade.

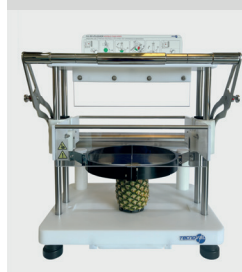

We proceed to change the cutting blade.

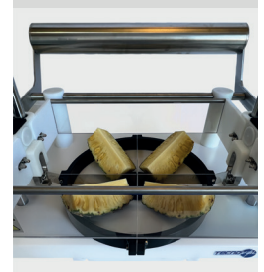

We place the desired cutting blade in the knife holder.

We place the fruit on the base to perform the cut.

We cut and obtain 4 portions of fruit.

### Clean and loss-free cutting.

Double bevel knife in food-grade stainless steel.

### User-friendliness

The exchange of the knife is done easily and safely through the locking device.

### Speed

The accessory change is done in just 10 seconds.

### Productivity

With this accessory, productivity increases since with a single action, we obtain multiple portions.

### Safety

The cutting is performed with great safety, as the lever is operated with both hands.
