

## FEATURES

Accessories that can be adapted to the F450 PRO machine to perform a single maneuver for cutting into 6 equal portions.

## DIMENSIONS

Up to 34 cm in diameter.

## MATERIALS

Composed of POM segments and a double-beveled stainless steel blade, suitable materials for the food sector.

## CUTTING BLADE 1/6

With the machine lowered, we activate the locking mechanism to proceed with the disassembly of the cutting blade.

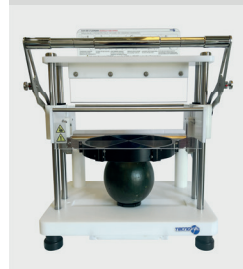

We proceed to change the cutting blade.

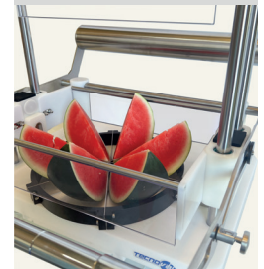

We place the desired cutting blade in the knife holder.

We place the fruit on the base to perform the cut.

We cut and obtain 6 portions of fruit.

### Clean cut without waste

Double bevel knife in food-grade stainless steel.

### Ease of use

The exchange of the knife is done easily and safely through the locking device.

### Speed

The accessory change is done in just 10 seconds.

### Productivity

With this accessory, productivity is increased, as a single operation yields multiple portions.

### Safety

The cut is carried out with a high level of safety, as the lever is operated with both hands.
